

CenterX achieves the HITRUST risk-based, two-year certification

Certification validates CenterX's commitment to meeting key regulations and protecting sensitive information

CenterX achieved the HITRUST Risk-Based, 2-Year (r2) Validated Certification, which is the **gold standard** and most widely adopted security framework in the healthcare industry.

- First certified in **2016**
- Implemented and effectively operated over **450 unique controls** spread across **19 domain areas**
- Achieved certification with **0 corrective action plans** identified across all in-scope controls

Services in CenterX's cloud-based suite that have been certified include:

- Electronic prior authorization
- Real-time benefit check
- Medical benefit decision support
- Patient and provider services
- Revenue cycle optimization

"This certification allows health systems and payers to interact with CenterX services with confidence that their data will be protected and handled appropriately."

– Adam Kunsemiller, Senior Director,
Security and Compliance for CenterX
